### DATA DRIVEN DECISION MAKING

Designed for instructional leaders, the Data Driven Decision Making trainings will support instructional planning from summative assessments through formative assessments to support daily instruction. Sessions will build upon each other from accessing granular data from the California Educator Reporting System or CERS, connecting the data to assessment blueprints, and develop a thoughtful and deliberate formative assessment system for the new school year. Resources from the Smarter Balanced Ecosystem that connect to the focus areas will be shared and utilized. Research based data analysis routines will be utilized during this process to support student learning and outcomes.
